***Allowable Subject Matter***

Claims 1-8 allowed.

The following is an examiner's statement of reasons for allowance: Hwang et al. (6,695,955) teaches a method of manufacturing a semiconductor device by: introducing a catalytic element for promoting crystallization of an amorphous semiconductor film into a portion of the amorphous semiconductor film (fig. 2A); converting the amorphous semiconductor film by a heat treatment to a crystalline semiconductor film (fig. 2B-D); adding an element selected from group 15 such as Phosphorous into an additional region of the crystalline semiconductor film (fig. 2C); gettering the catalytic element into the additional region from an adjacent region to the additional region by a heat treatment (fig. 3A-3B); forming an active layer on the crystalline semiconductor film (fig. 4D); and forming an insulating film covering the active layer (fig. 4E). However Hwang et al. does not qualify as prior art. Prior art does not teach or suggest introducing a catalytic element for promoting crystallization of an amorphous semiconductor film into a portion of the amorphous semiconductor film; converting the amorphous semiconductor film by a first heat treatment to a crystalline semiconductor film; adding an element selected from group 15 into an additional region of the crystalline semiconductor film; gettering the catalytic element into the additional region from an adjacent region to the additional region by a second heat treatment where gettering causes the catalytic element to migrate to an additional region; forming an active layer on the crystalline semiconductor film; and forming an insulating film covering the active

layer; and carrying out a third heat treatment in an oxidizing atmosphere after forming the insulating film.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohtani et al. (6,140,166) ; Linn et al. (6,255,195); Maszara (6,444,534); and Gotoh et al. (6,639,245).
